The Final Story Canadian Legion War Services

This is the second in the series of the story of the Canadian Legion War Services.

During the early part of 1942, rumors of impending action by the Canadian Army were constantly being passed back and forth in the field. Troops were engaged in schemes and the manoeuvres were accompanied by five C.I.W.S. supervisors. As late winter blossomed into spring the first Canadian division moved from their winter quarters around Hastings and Battle supposedly on an other manoeuvre and no one seemed to know just where these troops were heading or what their destination might be. This scheme lasted five weeks. By mid time the troops found themselves in Scotland. They embarked on landing ships in June and it was not until some time later that the information came through the press that the Allies had invaded Sicily.

To Canadians who were accompanied by six Legion supervisors to the Canadian Army, the first of the war service was the journey prior to embarkation—leaving one in Scotland with the rear party to travel some weeks later to the battle area.

For the most part, these supervisors had very little equipment, particularly the ones who were in the division who had nothing with them except what they could carry in their personal kit. The tank boys were very fortunate each carrying a motion picture projector and a fair supply of cigarettes, chocolate bars, writing paper and sports equipment. These men scrambled over the ship's sides and down the landing nets with the troops and landed on the beaches of Sicily with them. What little equipment they had in some cases had to be left on the beach to be picked up later.

This venture was an entirely new experience. There was no time available for establishing any sort of welfare service, so the senior supervisor instructed his men to place themselves in the hands of their respective commanding officers and to perform whatever duties may be required of them.

They acted as guides, traffic controllers, administered the first aid including taking charge of burial parties and many other duties.

The first opportunity that the Legion supervisors had to provide any organized welfare for the troops came when they reached Sicily where the army momentarily halted. Sports were commenced, concert parties entertained and moving pictures brought back familiar memories into mental lives.

Two Legion supervisors arrived in Campobasso while the fighting was still going on in the outskirts of the town. While searching for a suitable building to set up shop they were directed to the Savoy Theatre by a provost sergeant. That night the Germans shelled the town and with it the theatre killing a number of civilians.

The next day they with the aid of a volunteer crew cleaned up the rubble and by noon had the place ready to put on a movie show. However, higher authorities ruled it was not dangerous to have a concentration of men in that area and it was postponed for another day.

A Salvation Army supervisor had arrived in town simultaneously with the Legionnaires. That night, cleaning up another hall and the two organizations joined forces and in due course had three theatres and a club operating.

One day a Legion supervisor noticed outside of the town what looked like the remnants of a circus. Upon investigation he found a number of trapeze artists, tight rope walkers, clowns, dancers, tumblers, and a lion tamer. He immediately proceeded to build a show out of these. Further inquiry amongst the natives revealed that he had a number of musicians but no instruments.

In the meantime, the 1st Canadian Corps had arrived in Italy, with more supervisors. One supervisor had been torpedoed en route to the Mediterranean and lost all his equipment. To the C.I.W.S. goes the credit of building a most unusual theatre. When the army entered the town of St. Vito, they found there were no buildings of sufficient size to hold a movie show. So the Legion had the idea of roofing the town square. At first this seemed like an impossible task, but with the valuable assistance of the engineers the town square was finally roofed and used as a theatre.

Rome was the big centre for relaxation and here the supervisors besides maintaining and boosting morale considerably also contributed greatly to the education of the troops.

Many an ex-serviceman is richer to day in education and memory due to well-constructed tours to the Tomb of the Unknown Soldier, the Coliseum, the Basilica of Santa Maria Maggiore, St. John in Lateran, the Appian Way, Baths of Caracalla, Catacombs of San Callisto and San Sebastiano, St. Paul's, Pyramid of Caius the famous outdoor opera stadium Temple of Cataculla, seating a million Canadians and finishing with a public audience of Pope Pius XII at St. Peter's Cathedral.

(To be continued)

With The Curriers At The Rink

BY SKIPPY

Gleichen. MacDonald—wins the jackets. Nipawin. Wood of Winnipeg, not Woods of Gleichen—wins the Hudson case.

Dan MacDonald played Allan Quennell in the finals of the square draw to win the jackets. In a two out of three series. Dan took the first game 15 to 10 and then again on Saturday night edged Allan out with a 12-11 score. On Allan's rink were G. Walker, W. Hayes and H. Quennell. On Dan's rink (all time winners) G. Guthrie, A. Bogstie and B. Schmidt, Jr.

Small boy to currier: "Why did Ellie have to go to Lethbridge for three months?"

Currier: "To work."

Small boy: "He didn't do anything wrong, did he?"

Last week the bonspiel around the country got underway and at Rockyford B. Blaney took over a rink and after three days of continuous curling came out with a second prize. At the same time Gleichen was represented by three rinks at Arrowwood headed by V. Green, H. Bogstie and Cam Brown. These three rinks have little to say for their curling, for after three days Cam Brown came home with the only prize, and that, fourth in the consolation, Con-gradulations Cam.

The big event of the week is underway—the Calgary Bonspiel. Four rinks from Gleichen went and they all claim they will bring home the bacon. These rinks will be skippered by J. Collins, H. James, B. Brown and D. McDonald. Good luck fellows as it will be well needed!

This week very few curling games will be played as nearly all the curling rocks are in Calgary.

Just a suggestion for next year's 'spiel. A new rink, three sheets of ice, or seven if you use the arena. Why not draw the outsiders with a free trip to the Westinghouse Bonspiel all expenses paid. Just a suggestion but it could be done.

On Sunday a meeting of the curriers was held to discuss the Gleichen bonspiel which is scheduled to start on Tuesday January 28th. After considerable discussion they decided to keep the same rinks as they have at the present time and any vacancies were to be filled by curriers around town that are not curling as yet this year. Arrangements were also made for the Bonspiel dance which will be held on Friday, January 31st. Come and play those curling games all over again. We're dancing folk! Don't leave the house the draw for the \$50 bond!

ST. ANDREW'S CHURCH
Sunday January 26th
Evening 7:30 p.m.
Rev. D. A. Ford B.A., incumbent

HAPPY GANG HOST

One of the charter members of The Happy Gang is Bert Peart, the Gang's, daily half hour program is heard over the CBC Trans-Canada network at 11:15 a.m.

Town & District

E. R. Adams of Regina, Sask., spent the weekend in town visiting his brother-in-law, S. Hampton.

Pember Ostrander, a former resident of Gleichen spent a few days here last week visiting his cousin A. Quennell. Pember is connected with the Indian Department and is located in Saskatoon.

The high school hockey team played at Vulcan last week and won their game. The Pee Wees have played two games with Vulcan and in each case lost.

After packing ice each winter for years, and years at the Pioneer Meat Market, refrigerator, Bob Haskayne has gone modern and is installing an electric refrigerator. Carpenter W. Matheson has been busy lately remodeling the inside of the old refrigerator getting it ready for the new scheme of things. When he cut through the wall of the old refrigerator, to install a new door, he found it had eight layers of boards. These certainly were the days of plenty. Now days better substitutes for insulation than boards and paper are used.

Mr. and Mrs. Russell Hampton of Calgary spent a few days in town visiting the former's father, S. Hampton.

Miss Rachel James has gone to Vancouver for a short holiday. She went by the airplane route.

This is a great winter. As a rule we have a couple of days of zero weather then along comes a chinook and we have nice weather for a week. That is much better than continuous cold weather for two or three weeks.

It is not generally understood that a number of preserves items are not rationed and may be obtained with out coupons according to the Wartime Prices and Trade Board. This list of unrationed commodities includes: Apple butter, blackstrap molasses, canned fruits, canned fruit juices, cranberry sauce, glass fruits and peels, maple butter, maple cream and Laid's (apple) wax, small schino berries, minute seed new agri-culture's fruit fillers, fountain fruits, fruitcake, sorghum molasses and sorghum syrup.

Canada ship building industry has a backlog of orders of at least 110 million dollars.

Of great interest to agricultural Canada is the British Legion government's long awaited new agricultural bill. Both farm organizations officials and political observers show a keen interest in the debate on this bill in the British parliament and both will watch closely for some clue to its possible effects on Canada. Bo-

hind much of this interest is speculation about what would happen to our agriculture if socialism should ever be considered in Canada.

The socialist agricultural bill is in two parts. The first outlines the manner in which prices will be established and markets designated. The second part outlines the authoritarian control over the management of farms which would be exercised by the government. The guaranteed prices apply to cattle, sheep, pigs, eggs, wheat, barley, oats, rye, peas, corn and sugar beets. It involves eighteen months guarantee for crops and a two to four year guarantee for live stock prices. The method of formula for arriving at the guaranteed price is involved and may turn out to be very unsatisfactory for the farmers. Also in the bill is the threat of limitation to a restricted section of the home market.

It is the second section of the bill which gives most cause for serious consideration here. It deals with what the government decides is good farming management and practice. The power to take possession is given to the British minister of agriculture, after turning to the farmer that he is not efficiently operating his farm according to the requirements of the law. He will first be placed under government supervision for twelve months and then if he does not comply with the directions of the government he must lease his farm to an "approved" farmer.

The most apparent feature of the socialist agricultural policy is that it is a defeatist one and aimed at maintaining permanently an uneconomic standard for agriculture in British. What effect this will have on our market for farm products is one of the questions asked here.

Melrose

It's strong and pure.

A Popular Appointment

THE APPOINTMENT of Mr. Francis Melrose to the post of Australian High Commissioner for Canada has aroused much interest in this country. During the war, bonds between Canada and Australia were strengthened in many ways. Both dominions had special interests in Allied operations in the Pacific, and under the Commonwealth Air Training Plan, thousands of Australian airmen received instruction here. These men not only learned a great deal about Canada during their stay in this country, but they made the many Canadians with whom they came in contact more familiar with conditions in our sister dominion "down under." Thus there is more than usual interest in the appointment of a prominent Australian to the post of High Commissioner for Canada.

Was Deputy Party Leader

Mr. Forde, who is 56 years old, is described as a veteran parliamentarian. He represented a federal division in Australia for 24 years, and for five years before he had been a member of the Queensland state legislature. From 1922 until his retirement last September because of personal defeat in the Australian general election, Mr. Forde had been deputy leader of the Labor party and in an early Labor government he was minister of trade and customs, and acting minister of markets and transport. When the Labor party came into power in 1941 Mr. Forde became the deputy prime minister and for some time in 1945, following the death of Premier Curtin, he was the head of the government.

Held Post Of Army Minister

During the critical years from 1941 to 1945 Mr. Forde held the army portfolio in his government, and he also headed the Australian delegation to the San Francisco Conference in 1945. Known for his pleasant personality and ability as a public speaker, Mr. Forde will without doubt be a popular figure in public life in Canada during his term of office here, and in addition it is clear that he brings both wide experience and outstanding ability to his new position. It is with pleasure that the people of Canada look to a strengthening of the friendly bonds between this country and Australia in the years to come.

FROM SORE, PAINFUL PILLS**

SET ROAD FLARES TO PROTECT DRUNKS

OLYMPIA, Wash.—A state patrolman sighted two warning flares on a lonely highway, pulled up to investigate and found two unconscious drunks sitting in middle of the road. The patrolman said he learned later that a considerable truck driver had set out the flares rather than try to talk the pair into going home.

Attractions Jasper National Park

Mention of Jasper National Park always conjures up memories of early explorations in the "Far West," since the region in which it is situated has a fascinating historical background. Easy for traders, explorers and many other pioneers traveled or hunted through its valleys and over its mountain fortresses. In bygone days a the far brigades traveled on the famous Athabasca Trail, the Eastern Brigade coming up the Athabasca River from Fort Edmonton and through the Athabasca Pass to a point where it was met by the

Western Brigade from the Pacific Ocean. While much of the glory of the trail departed with the passing of the fur trader, the building of the railroad across that section of the Canadian Rockies once again revived interest in this superb scenic area.

Established in 1907, the park has an area of 4,000 square miles and is one of the largest national parks in North America. Within its boundaries lie the vast Columbia Ice Field, 160 square miles in extent. From the summit of this immense ice cap issue numerous glaciers giving birth to rivers which eventually find their way to three oceans.

As may be expected, Jasper National Park has become one of Canada's most popular outdoor playgrounds. Within its boundaries are so many

attractions that it is difficult for short time visitors to take in everything in one trip and, year after year, many return together with thousands of new tourists who travel to Jasper Park to enjoy its majestic scenery and recreational facilities.

Swimming in the many beautiful lakes of the Jasper area is an exhilarating and healthful sport, especially for the young and vigorous. The lure of the hot springs at the town of Jasper, has long been established. These springs are among the hottest in the Canadian Rockies.

One of the most delightful recreations in the park is sport fishing. A dozen lake lie within three miles of the town Rainbow, cultural,

brown, and lake trout are within easy reach of the angler. Rapidly proving a major attraction for tourists is one of the largest fish hatcheries in Canada where as many as 200,000 fingerling trout may be seen in the main building. The importance of this hatchery in re-stocking the lakes and streams in the Jasper area is now widely recognized.

For some years Jasper National Park has been one of the principal outfitting points in the Rockies for trail riding expeditions, which in recent years have become very popular. Hundreds of miles of well-kept trails leading to dazzling glaciers, through green valleys bright with flowers and glittering brooks, past rushing tor-

IMPORTANT GOVERNMENT NOTICE

Respecting Price Control

The Wartime Prices and Trade Regulations (Order in Council P.C. 8528 of November 1, 1941) established basic period maximum prices for goods and designated services. These regulations were passed under the authority of the War Measures Act and continued in force under the National Emergency Transitional Powers Act, 1945.

From time to time these basic maximum prices have been varied or the fixed maximum has been suspended in the case of particular goods and services by Orders issued by the Wartime Prices and Trade Board under the authority of the Regulations. A few days ago a substantial number of suspensions from price control was announced.

I believe it is desirable therefore that a summary should now be published of those goods and services on which a legal maximum price remains in force under the provisions of the Wartime Prices and Trade Regulations so that all citizens may be given an opportunity to inform themselves of the law.

The complete price control regulations are contained in Wartime Prices and Trade Board Order No. 684 which is available to the public at any office of the Wartime Prices and Trade Board, and to which reference should be made for exact details.

Douglas Abbott
Minister of Finance.

GOODS AND SERVICES REMAINING SUBJECT TO MAXIMUM PRICES

Under Wartime Prices and Trade Board Order No. 684

FOODS

- All flours, four mixes and meal.
- Yeast.
- Bread, bread rolls, biscuits and bakery products.
- Processed cereals, including breakfast cereals, macaroni, vermicelli, spaghetti, noodles and other alimentary paste products.
- Rice.
- Pot and pearl barley.
- Dried corn, not including popcorn.
- Shelled peas, soy beans, dried beans except lima beans and red kidney beans.
- Baking powder.
- Sugar, sugar cane syrup, corn syrup, grape sugar, molasses.
- Honey.
- Maple products—1946 production.
- Candy, confectionery and caramels.
- Tea, coffee, coffee concentrates.
- Cocoa beans, cocoa butter, cocoa and chocolate and beverage preparations containing cocoa or powdered milk.
- Soft drinks and soft drink concentrates, except mineral, sparkling or spring waters in their natural form.
- Malt, malt extract, malt syrup.
- Vinegar.
- Black pepper and white pepper, and substitutes containing black or white pepper.
- Butter.
- Cacao.
- Cheddar cheese, processed cheese and cream cheese.
- Concentrated milk products of all kinds.
- Ice cream.
- Prepared salad dressings, salad and cooking oils.
- Salt.
- Fruit juices—1946 crop.
- Raisins, currants, prunes, dried dates, dehydrated apples.
- Tomatoes, tomato sauce, tomato paste, tomato pulp, tomato puree, tomato catsup, chili sauce, when not chemically sealed cans or glass.
- Canned pork and beans, canned spaghetti and canned soups.
- Canned corn, canned peas, canned beans excluding the lima and kidney varieties.
- Canned apricots, canned cherries, canned plums.
- Fruits and vegetables in the two preceding items when from and sold in consumer size packages.
- Jam, jellies, marmalades.
- Meat and meat products, not including game, pet foods, and certain varieties of cooked and canned meats and sandwich spreads.

- Sewage cleansers, animal and vegetable.
- Live and dressed poultry, poultry carcasses except certain varieties of canned poultry and poultry sand which spread.
- Eggs in the shell, egg froths or powders.
- Canned salmon, canned sea trout, canned pickles.
- Edible animal and vegetable fats including lard and shortenings.

CLOTHING

- Men's, youth's and boys' suits, coats and other clothing except fur coats.
- Fabric coats.
- Men's, youth's and boys' suits, coats and other clothing, including coats, blouses, undershirts, pajamas, night shirts and dressing gowns.
- Women's, misses', girls' children's and infant's garments of all kinds (except fur coats) and of any material (except pure silk).
- Bedwear and foundation garments.
- Women's, misses', girls' and children's accessories as follows: neckties, hats, handkerchiefs, scarves, cuffs and gloves.
- Children's and infant's headwear of all kinds, except swimwear, millinery or hats made from fur felt.
- Knitted wear of all kinds for either sex, including undershirts, pajamas, night shirts, hosiery, stockings, socks and underwear, but not including pure silk garments, silk stockings or women's and misses' hosiery.
- Handkerchiefs.
- Work clothing, including aprons, for either sex.
- Uniforms for either sex.
- Sportswear for either sex, but not including bathing suits and bathing caps.
- Rubber clothing, rubberized clothing, waterproof, showerproof and cold clothing, except specialized bathing clothing.
- Closures, fasteners, metal and mittens of all kinds for either sex, except those designed as specialized sports equipment for specialized activities.
- Rubber and diaper supports.
- Footwear of all kinds and of any material.

HOUSEHOLD AND OTHER TEXTILES

- Auto and travelling rug, awnings, bath mats, bedspreads, blankets of all kinds, caisses frons, cat table covers, car floor mats, cushion forms, dish cloths, dish towels, drapes, curtains, floor cloths, hammocks, luncheon sets, mattresses of all kinds, napkins, pillow cases, pillow forms, quilts, table covers.

- Including rubber and plastic coated sheeting, shower curtains, silicone cloth, sleeping bag, spring table, cotton tents, throw-overs, towels, wash cloths, window blinds, window shades.
- Slip covers for furniture; covers for baby carriages, bassinets, cribs, cushions, mattresses, blankets, boards and toilet seats.
- Pads for baby bays, baby carriages, car tables, chairs, trunks, beds, mattresses and playpens.
- Bag for household use, garment bags, lavender, dunnage bags.
- Tarpaulins and other protective coverings of canvas.
- Scrap fabric, including used scrap fabric except wiping rag.
- Floor rug and mats chiefly of wool.
- Table and shelf cloths.

DOMESTIC FUELS

- Coal, coke and briquettes.
- Wood fuel, sawdust and

HOUSEHOLD EQUIPMENT AND SUPPLIES

- Cooking stoves and ranges, but not including refrigerators.
- Electrical and gas refrigerators.
- Washing machines.
- Furnaces, boiler heaters and other heating equipment except portable electric heater.
- Jacket heaters and other water heating equipment.
- Plumbing and sanitary equipment as follows:
 - (A) All pipe and fittings of a type and size suitable for installation in domestic plumbing or water systems.
 - (B) All equipment known commonly as "plumber's brass".
 - (C) Other plumbing and sanitary equipment as follows:—bathtubs, closet bowls, specialized toilet seats and hinges, chemical toilets, floor tanks, household water softeners, household water storage tanks, lavatories, laundry tubs, electric tanks, sink and toilet traps, and drains.
 - Domestic sewing machines.
 - Soap and soap compounds.

MOTOR VEHICLES AND ACCESSORIES, BICYCLES

- Motor vehicles, including parts and accessories as follows: passenger motor vehicles, motor trucks, motor cars, motor cycles, trucks and trailers used with trucks.
- Automotive truck bodies.
- Pneumatic tires and tubes.
- Storage batteries, except for specialized industrial use.

CONSTRUCTION PRODUCTS

- Lumber of all kinds.
- Millwork such as doors, sashes, windows, stairs and gates.
- Paints and varnishes.
- Pre-cut lumber products designed for use in the construction of farm buildings, but not including fully pre-fabricated buildings.
- Gypsum board and gypsum lath.
- Wallboards and building materials.
- Insulation products, but not including pipe and boiler coverings.
- Building lines and plaster.
- Cast iron soil pipe.
- Cast iron, rivets, bolts and nuts.
- Builders' hardware and tools.
- Builders' hardware and tools, devices for residential buildings.

AGRICULTURAL MACHINERY, IMPLEMENTS, EQUIPMENT AND SUPPLIES

- Practically all items of farm machinery, including planting, seeding and fertilizing equipment, plows, tillage implements and cultivators, haying machinery, harvesting machinery, tractors, water pumps, sprayers and dusters.
- Articles of barn and barnyard equipment.
- Incubators, brooders, poultry feeding and watering equipment.
- Harness and harness hardware.
- Barbed wire and other fencing wire and fence.
- Horseshoes and horseshoe nails.
- Bladder twine.
- Wheelbarrows.
- Base-iron and steel products of all kinds except horse meat, pig feeds, steer, clam shell and poultry grit.
- Household water softeners, household water storage tanks, lavatories, laundry tubs, electric tanks, sink and toilet traps, and drains.
- Domestic sewing machines.
- Soap and soap compounds.
- Grain separators.

RAW AND PROCESSED MATERIALS

- Base-iron and steel products and alloys, including pig iron, cast iron, scrap iron, plate, rods, and wire.
- Primary, secondary and fabricated mill forms of the following non-ferrous metals and their alloys: aluminum, antimony, copper, lead, nickel, tin and zinc.

Tractor distillates and gasoline

- Crude rubber, synthetic rubber and latices, reclaimed rubber.
- Basic industrial or agricultural chemicals.
- Dyes, pigments and oxides.
- Plastic sheeting and other plastic shapes for further processing.
- Crushed or burnt limestone.
- All fats and oils, including Vitamin A oils, of natural, vegetable or marine origin but not including cod liver oil when bottled for sale at retail.
- Natural occurring animal or vegetable waxes, but not including synthetic waxes.
- Glue, stucco, glue and adhesives.
- Starches.
- All kinds of knitted or woven fabrics, except pure silk fabrics.
- Bobbinet, dress and curtain nets and settings.
- Yarns and threads, except pure silk, for the knitting and weaving of fabrics.
- Fibres (natural and synthetic) except pure silk fibres used in the manufacture of yarns and threads and waste products from processing.
- Beaving, mohair, mohair and cloth yarns, threads and floss, except pure silk.
- Rubberized, plastic and other coated fabrics.
- Elastic yarns, fabrics, and webbing.
- Cotton, wool or hair felt.
- Down and feathers but not including decorative feathers.
- Hides and skins from animals, reptiles or fish, of a type ordinarily processed for use as a leather.
- Leathers and synthetic leathers of all kinds.
- Sheepskin, shearling, tanned, but not further processed than combbed or sheared and coloured on the flesh side.

PULP, PAPER AND PAPER PRODUCTS

- Wastepaper.
- Wood pulp, except (a) dissolving grades, (b) wood pulp of bleached or sulphate, (c) groundwood and unbleached sulphate grades sold for the manufacture of newspaper or hanging paper.
- Newspaper paper except when sold by manufacturers thereof.
- Certain paper products of book, writing, light weight and various paper mills such as bond and stationery paper, duplicating paper, book and writing paper, Bristol, uncoated blotting paper, cover paper and most papers for converting purposes.

PAPERS used for converting or printing purposes made wholly or partly of bleached or unbleached Kraft pulp and Kraft waste.

- Paper board used in the manufacture of solid paper-board, except for wrapping newspaper paper or making newspaper covers.

CONTAINERS AND PACKAGING MATERIALS

- Containers, packaging egg wrapping devices of all types used for the sale or shipment of products when made in whole or in part from wood, metal, plastic, glass, fabric or other solid or corrugated fibre board, and partitions and interior parts used in containers.
- Corrugated or solid fibre board sheets or rolls used for wrapping or packaging.
- Carton cartage.

SERVICES

- Transportation of goods and services associated therewith.
- Warehousing: dry storage of general merchandise and household goods other than wrapping material or storage, including rental of lockers and ancillary services such as processing charges in cold storage plants.
- Household laundering services.
- Supplying of meals or refreshments for consumption on the premises, the supplying of beverages (except alcoholic beverages) for purveyors of meals or refreshments, the supplying of meals with sleeping accommodation for a combined charge, but not including the supplying of meals, refreshments or sleeping accommodation by an employer to his employees, directly or through a servant or agent.
- The service of printing, the printing or packaging of other manufacturing processes, when performed by any goods subject to maximum prices, when performed on a custom of commission basis.

USED GOODS

- Scrap goods, except scrap rubber and wiring rags.
- Household mechanical, electrical, electronic and other appliances, electric washing machines, domestic sewing machines.
- Bicycles.
- Motor vehicles as follows:—passenger motor vehicles designed to carry less than ten persons; trucks of all kinds; trailers used with trucks.

Any material shown above processed for incorporation into, or any fabricated component part of any of the above goods is subject to maximum prices. Also any set which contains an article referred to above is subject to maximum prices even though the remainder of the set consists of articles not referred to.

The foregoing is only a convenient summary of Board Order No. 684. It does not give the full legal text. For full details of the law reference should be made to the Order.

We want EATON'S general Catalogue and information Catalogue to customers who buy regularly by mail or through one of our order offices. The total number of catalogue printed is limited by available materials and we try to ship what we print, one to a household. You can help, by giving the full name of the head of the household and the correct address every time you order. This will ensure that your family automatically gets its EATON'S Catalogue regularly.

ANOTHER PATRONAGE DIVIDEND to PIONEER CUSTOMERS

Within the next two weeks we will pay a patronage dividend to customers who made deliveries for the season 1943-44. If, therefore, you made deliveries to us during that season, get in touch with our agent for further particulars.

We have distributed patronage dividends to our customers for the seasons 1941-42; 1942-43; 1945-46.

It is also our intention to distribute a patronage dividend for the season 1944-45 in due course.

ticularly vegetables, of their health value. Health officers urge cooking of potatoes, for instance, in their skins. This prevents the essential minerals and vitamins from "leaking" out. Faulty cooking can rob foods, par-

T. E. Hincks Buys Community Theatre From R. W. Blick

The management of the Community Theatre changed hands last week. The former owner, Mr. R. W. Blick, sold his interest to Mr. T. E. Hincks, who has been Mr. Blick's projectionist since last May. Mr. Hincks served in the R.C.M. for two and a half years and received his discharge due to medical reasons early in the war.

The new owner has been associated with the show business for eleven years and so with his knowledge of pictures Gleichen should see many excellent shows in the future.

The pictures will continue to be shown on Friday nights with a Saturday afternoon matinee and evening show.

WINTER WHEAT

Winter wheat, a crop which has proven too hazardous for general use in the Prairie Provinces since the war, is now being grown successfully. The advantages of winter wheat, where it is grown successfully, are that it yields more, it is more resistant to drought and weeds, and it gets ahead of late summer drought and early fall frosts, in yielding capacity, and (recently) in price.

Results of Experiments. Experiments on varieties of winter wheat and methods of growing the crop have been conducted in the Prairie Provinces for the past 25 years. At the University, Saskatoon, years of experimentation showed that winter wheat sown on open, unprotected summer fallow usually winter-killed, but when the crop was protected by snow trapped by trees, hedges, or rows of sunflower stalks, it generally survived.

AREAS OF PRODUCTION.—Available reports show that, in 1944-45, winter wheat comprised about 6% of the total wheat acreage of the Conley, Macleod, Carleton, Lethbridge, Medicine Hat, Manyberries districts of Southern Alberta, and 6.5% of the Beaverlodge, Grand Prairie, Fairview area of the North. In other parts of Alberta the acreage is very small. In Saskatchewan considerable success with winter wheat has been achieved in the Seneca-Eastern area, and in the Manawaka Lake district of the North. In Manitoba there has been practically no success with winter wheat growing.

SUGGESTIONS.—Three suggestions are offered to those interested in winter wheat. (1) Do not attempt growing winter wheat unless the situation and conditions appear favorable. (2) Sow relatively few acres using recommended varieties and procedure. (3) Report your results, whether a success or failure, to the nearest University or Dominion Experimental Station.

The increase in manufacturing in Canada is more than 60 percent over previous peace time years. The increase in logging is over 150 percent.

Pointing out that not even milk is a perfect, self-sufficient food, nutritionists urge inclusion of all the nutritional factors in diet by combining such staples as milk, fruit, vegetables, cereals, bread, meat or fish, so that a meal will provide all the essentials to maintenance of health.

Sgt. What's the matter with you? Recruit! I have a pain in my abdomen. Sgt. What do you mean, abdomen? Only officers have abdomens. Sgts. have stomachs, and what you have is a pain in your belly.

NATIONAL PARK
ATTRACTIONS JASPER
rents, into great dark forests and around lake lakes reflecting white clouds and deep blue skies.

Headquarters of the park and the starting point for recreational activities is the little town of Jasper, which derives its name from Jasper House, a trading post established on the Athabasca River about 1813 by the North West Company. A resident superintendent supervises the administration.

istration of the park. Accommodation is provided by several hotels, by a number of well equipped bungalows and several auto camps, chalets, and camps. Here tourists may enjoy the modern conveniences and still admire a mountain picture framed in every window.

Motorists on the Banff-Jasper Highway may view much of the finest mountain scenery in the world since the road is always in sight of towering ranges as it runs through the heart of the Rockies. From Jasper, the highway follows a great instrument trench through the valleys of the Athabasca, Smoky, North Saskatchewan, Misty, and Bow Rivers, and tourists may drive within a few hundred feet of the Athabasca Glacier. Eleven of the highest peaks of the Canadian Rockies are in the immediate vicinity of this road. Opportunities along the highway to view active fauna are excellent. In spite of the wild country through which it passes, the highway has none of the terrors sometimes associated with mountain roads, since it was built with a view to providing the utmost safety for motorists.

Today the tourist, seeking healthful recreation and inspiring beauty, travels right into the heart of Jasper Park in the comfort of his automobile or in a luxurious railway car. But for those who prefer thrilling adventures, away from the park highways there are still many opportunities in this fascinating and forbidding alpine region. Trail riding, mountain climbing and skiing over majestic mountain terrain that is silent and changeable do much to satisfy the most ardent of modern pathfinders.

A grand and high-stepping monarch was old Louis XIV—they still talk about him back in his old home town. Nothing was too good for Louis—in fact, the best was just good enough.

Yet his magnificent palace had neither gas nor electricity and there wasn't a tiled shower-bath in the place.

Today the average Canadian citizen enjoys conveniences and comforts exceeding Louis XIV's most extravagant dreams. And many things which we regard as absolute necessities would have seemed the most elegant luxuries to Louis.

Advertising has made possible this widespread distribution of the good things of life. Advertising has made possible large-scale production and large-scale selling, resulting in prices that take luxuries out of the "for-kings-only" class.
